

SHAPING SNOWFIELDS QUARTER

RESIDENT WORKSHOP

**6pm - 7:30pm Tuesday 21 November at
Leathermarket JMB, 26 Leathermarket Street**

The Resident Social Value Workshop is your chance to discuss and inform the community social value Snowfields Quarter could provide. This will include new community spaces, job opportunities, engaging people in science, and promoting health and well-being.

SNOWFIELDS QUARTER

Snowsfields Quarter will be a series of new buildings that will create space for life sciences in London Bridge.

Our vision is to create a place where medical research and innovation come together to find solutions to the biggest health challenges to support a healthier future for everyone.

Snowsfields Quarter will generate long-lasting benefits for the local community, including new community spaces, job opportunities, engaging people in science, and promoting health and well-being.

We have been listening to residents, community groups, and people who work or study in the area to understand local priorities. This information was presented at consultation events in October and is available on our website.

We now invite you to join a Resident Social Value Workshop to discuss our initial ideas and provide further feedback for the community spaces and new buildings.

We look forward to seeing you.
